

Index to Volumes 160 & 161

- Anflous K, *see* Saks VA *et al.*
 Arad M, Oxman T, Leor R and Rabinowitz B: Prostaglandins and the antiarrhythmic effect of preconditioning in the isolated rat heart 249–255
 Athias P, *see* Fantini E *et al.*
 Autenrieth A, *see* Müller-Werdan U *et al.*
- Bartel S, *see* Hoch B *et al.*
 Benigno M, *see* Cargnoni A *et al.*
 Benndorf R, *see* Hoch B *et al.*
 Beręsewicz A, *see* Bilińska M *et al.*
 Bilińska M, Mączewski M and Beręsewicz A: Donors of nitric oxide mimic effects of ischaemic preconditioning on reperfusion induced arrhythmias in isolated rat heart 265–271
 Bing RJ and Susuki H: Myocardial infarction and nitric oxide 303–306
 Blasig IE, Dickens BF, Weglicki WB and Kramer JH: Uncoupling of mitochondrial oxidative phosphorylation alters lipid peroxidation-derived free radical production but not recovery of postischemic rat hearts and post-hypoxic endothelial cells 167–177
 Bohm J, *see* Lammerich A *et al.*
 Borda E, *see* Sterin-Borda L *et al.*
 Bravený P, *see* Šimurda J *et al.*
 Breier A, Ziegelhöffer A, Famulsky K, Michalak M and Slezák J: Is cysteine residue important in FITC-sensitive ATP-binding site of P-type ATPases? A commentary to the state of the art 89–93
 Breier A, *see* Ziegelhöffer A *et al.*
- Caldarera CM, *see* Muscari C *et al.*
 Cargnoni A, Ceconi C, Curello S, Benigno M, de Jong JW and Ferrari R: Relation between energy metabolism, glycolysis, noradrenaline release and duration of ischemia 187–194
 Carriquiriborde M, *see* Mosca SM *et al.*
 Ceconi C, *see* Cargnoni A *et al.*
 Christé G, *see* Šimurda J *et al.*
 Cingolani HE, *see* Mosca SM *et al.*
 Clô C, *see* Muscari C *et al.*
 Cremaschi G, *see* Sterin-Borda L *et al.*
 Curello S, *see* Cargnoni A *et al.*
- Dai J, Liu S-Y and Panagia V: Kinetics of myocardial phospholipase D 83–87
 Daneshrad Z, *see* Saks VA *et al.*
 Das DK, *see* Maulik N
 De Jong JW, *see* Cargnoni A *et al.*
 Dhalla NS, *see* Matsubara T
 Dickens BF, *see* Blasig *et al.*
 Džurba A, *see* Ziegelhöffer A *et al.*
- Echagüe AV, *see* Sterin-Borda L *et al.*
 Endoh M, *see* Norota I

- Famulsky K, *see* Breier A *et al.*
- Fantini, Athias P, Tirosch R and Pinson A: Effect of TaiCatoxin (TCX) on the electrophysiological, mechanical and biochemical characteristics of spontaneously beating ventricular cardiomyocytes 61-65
- Ferrari R, *see* Cargnoni A *et al.*
- Fontaine E, *see* Saks VA *et al.*
- Fraysse B, *see* Levitsky DO *et al.*
- Garnier A, *see* Lavanch N *et al.*
- Genaro AM, *see* Sterin-Borda L *et al.*
- Giaccarei A, *see* Muscari C *et al.*
- Giordano E, *see* Muscari C *et al.*
- Goin JC, *see* Sterin-Borda L *et al.*
- Grably S, *see* Lavanchy N *et al.*
- Guarnieri C, *see* Muscari C *et al.*
- Günther J, *see* Lammerich A *et al.*
- Hammer C, *see* Müller-Werdan U *et al.*
- Hasenfuss G, *see* Schillinger W *et al.*
- Henning U, Wallukat G and Holtzhauer M: Influence of glycosylation inhibitors on dihydropyridine binding to cardiac cells 47-52
- Henning U, Wolf W-P and Holtzhauer M: Primary cultures of cardiac muscle cells as models for investigation of protein glycosylation 41-46
- Hill M, *see* Kaul N *et al.*
- Hoch B, Lutsch G, Schlegel W-P, Stahl J, Wallukat G, Bartel S, Krause E-G, Benndorf R and Karczewski P: HSP25 in isolated perfused rat hearts: Localization and response to hyperthermia 231-239
- Holtzhauer M, *see* Henning U *et al.*
- Htun P, *see* Strasser R *et al.*
- Iwasaki T, *see* Ohyanagi M
- Just H, *see* Schillinger W *et al.*
- Karczewski P, *see* Hoch B *et al.*
- Karoly K, *see* Wilson S *et al.*
- Kaul N, Siveski-Iliskovic N, Hill M, Khaper N, Seneviratne C and Singal PK: Probucol treatment reverses antioxidant and functional deficit in diabetic cardiomyopathy 283-288
- Kecskemeti V, Pacher P, Pankucsi C and Nanasi P: Comparative study of cardiac electrophysiological effects of atrial natriuretic peptide 53-59
- Keriel C, *see* Saks VA *et al.*
- Khaper N, *see* Kaul N *et al.*
- Klein D, *see* Müller-Werdan U *et al.*
- Koidl B, *see* Müller-Werdan U *et al.*
- Kölbels F and Schreiber V: The endogenous digitalis-like factor 111-115
- Kramer JH, *see* Blasig IE *et al.*
- Krause E-G, Rabitzsch G, Noll F, Mair J and Puschendorf B: Glycogen phosphorylase isoenzyme BB in diagnosis of myocardial ischaemic injury and infarction 289-295
- Krause E-G, *see* Hoch B *et al.*
- Kuwajima G, *see* Schillinger W *et al.*
- Lammerich A, Böhm J, Schimke I, Wagner K-D, E. Storch and Günther J: Effects of hypoxia, simulated ischemia and reoxygenation on the contractile function of human atrial trabeculae 143-151
- Lavanchy L, Grably S, Garnier A and Rossi A: Crucial role of intracellular effectors on glycogenolysis in the isolated rat heart: potential consequences on the myocardial tolerance to ischemia 273-282
- Leor R, *see* Arad M *et al.*
- Leoty C, *see* Levitsky DO *et al.*

- Leverve X, *see* Saks VA *et al.*
- Levitsky, DO, Frayssé B, Leoty C, Nicoll DA and Philipson KD: Cooperative interaction between Ca^{2+} binding sites in the hydrophilic loop of the Na^+ - Ca^{2+} exchanger 27-32
- Liu S-Y, *see* Dai J *et al.*
- Lochner A, Tromp E and Mouton R: Signal transduction in myocardial ischaemia and reperfusion 129-136
- Löhn M, Szymanski G and Markwardt F: Deformation of the Bowditch staircase in Ca^{2+} -overloaded mammalian cardiac tissue - A calcium phenomenon? 13-25
- Löw-Friedrich I, *see* Sharma HS *et al.*
- Lutsch G, *see* Hoch B *et al.*
- Mączewski M, *see* Bilińska *et al.*
- Mair J, *see* Krause E-G *et al.*
- Markwardt F, *see* Löhn M *et al.*
- Michalak M, *see* Breier A *et al.*
- Mikoshiha K, *see* Schillinger W *et al.*
- Matsubara T and Dhalla NS: Relationship between mechanical dysfunction and depression of sarcolemmal Ca^{2+} -pump activity in hearts perfused with oxygen free radicals 179-185
- Maulik N and Das DK: Molecular cloning, sequencing and expression analysis of a fatty acid transport gene in rat heart induced by ischemic preconditioning and oxidative stress 241-247
- Mosca SM, Carriquiriborde M and Cingolani HE: Biphasic changes in relaxation following reperfusion after myocardial ischemia 123-128
- Mouton R, *see* Lochner A *et al.*
- Müller-Werdan U, Koidl B, Autenrieth A, Klein D, Werdan K and Hammer C: Xenoreactive natural antibodies and induced antibodies - Their effects on beating cardiomyocytes as a model of a xenograft 315-324
- Müller W-D, *see* Wallukat G *et al.*
- Meyer M, *see* Schillinger W *et al.*
- Muscari C, Giaccari A, Giordano E, Clò C, Guarnieri C and Caldarera CM: Role of reactive oxygen species in cardiovascular aging 159-166
- Nanasi P, *see* Kecskemeti V *et al.*
- Neyses L, *see* Pelzer T *et al.*
- Nicoll DA, *see* Levitsky DO *et al.*
- Noll F, *see* Krause E-G *et al.*
- Norota I and Endoh M: Pharmacological characteristics of endothelin receptors in the rabbit ventricular myocardium: the nonselective endothelin receptor antagonist PD 145065 antagonizes the positive inotropic effect of endothelin-3 but not of endothelin-1 67-74
- Novel-Chaté V, *see* Saks VA *et al.*
- Ohyanagi M and Iwasaki T: The guanine nucleotide-binding regulatory proteins (G proteins) in myocardium with ischemia 153-157
- Oxman T, *see* Arad M *et al.*
- Pacher P, *see* Kecskemeti V *et al.*
- Palmiter KA, *see* Powers FM *et al.*
- Panagia V, *see* Dai J *et al.*
- Pankucsi C, *see* Kecskemeti V *et al.*
- Papp J, *see* Wilson S *et al.*
- Parratt JR, *see* Wilson S *et al.*
- Pelzer T, Shamin A and Neyses L: Estrogen effects in the heart 307-313
- Philipson KD, *see* Levitsky DO *et al.*
- Pinson A, *see* Fantini E *et al.*
- Pinson A and Tirosh R: Reversible and irreversible damage in reoxygenated 'ischemic' ventricular myocytes in culture 137-141
- Powers FM, Palmiter KA and Solaro RJ: E-1020, a water soluble imidazopyridine, has direct effects on Ca^{2+} -dependent force and ATP hydrolysis of canine and ovine cardiac myofilaments 33-39

Puschendorf B, *see* Krause E-G *et al.*

Pyne NJ, *see* Wilson S *et al.*

Rabinowitz B, *see* Arad M *et al.*

Rabitzsch G, *see* Krause E-G *et al.*

Rappaport L, *see* Saks VA *et al.*

Ravingerova T, *see* Wilson S *et al.*

Ravingerová T, *see* Ziegelhöffner A *et al.*

Repke KRH: Reinstatement of the ATP high energy paradigm

95-99

Rossi A, *see* Saks VA *et al.*

Rossi A, *see* Lavanchy N *et al.*

Saks VA, Tiivel T, Kay L, Novel-Chaté V, Daneshrad Z, Rossi A, Fontaine E, Keriél C, Leverve X, Ventura-Clapier R, Anfous K, Samuel J-L and Rappaport L: On the regulation of cellular energetics in health and disease

195-208

Samuel J-L, *see* Saks VA *et al.*

Schaper W, *see* Strasser R *et al.*

Schillinger W, Meyer M, Kuwajima G, Mikoshiba K, Just H and Hasenfuss G: Unaltered ryanodine receptor protein levels in ischemic cardiomyopathy

297-302

Schimke I, *see* Lammerich A *et al.*

Schlegel W-P, *see* Hoch B *et al.*

Schreiber V, *see* Kölbel F *et al.*

Seneviratne C, *see* Kaul N *et al.*

Shamim A, *see* Pelzer T *et al.*

Sharma HS, Stahl J, Weisensee D and Löw-Friedrich I: Cytoprotective mechanisms in cultured cardiomyocytes

217-224

Simon H-U, *see* Wallukat G *et al.*

Šimurda J, Šimurdová M, Bravenýl, P and Christé G: Control of cardiac performance by Ca-turnover

5-12

Šimurdová M, *see* Šimurda J *et al.*

Singal PK, *see* Kaul N *et al.*

Siveski-Iliskovic N, *see* Kaul N *et al.*

Slezák J, *see* Breier A *et al.*

Slezák J, *see* Ziegelhöffner A *et al.*

Solaro RJ, *see* Powers FM *et al.*

Song W, *see* Wilson S *et al.*

Stahl J, *see* Sharma HS *et al.*

Stahl J, *see* Hoch B *et al.*

Sterin-Borda L, Cremaschi G, Genaro AM, Echagüe AV, Goin JC and Borda E: Involvement of nitric oxide synthase and protein kinase C activation on chagasic antibodies action upon cardiac contractility

75-82

Storch E, *see* Lammerich A *et al.*

Suzuki H, *see* Bing RJ *et al.*

Szekeres L, *see* Ziegelhöffner A *et al.*

Szymanski G, *see* Löhn M *et al.*

Strasser R, Htun P and Schaper W: Salvage of jeopardized myocardium by ischemic preconditioning: Is the quest over?

209-215

Tiivel T, *see* Saks VA *et al.*

Tirosh R, *see* Fantini E *et al.*

Tirosh R, *see* Pinson A *et al.*

Tomisawa S, *see* Wilson S *et al.*

Tribulová N, *see* Ziegelhöffner A *et al.*

Tromp E, *see* Lochner A *et al.*

- Vegh A, *see* Wilson S *et al.*
 Ventura-Clapier R, *see* Saks VA *et al.*
- Wagner K-D, *see* Lammerich A *et al.*
 Wallukat G, Simon HU, Müller W-D and Wolf I: Functional antagonism by a monoclonal antibody to digoxin in a test system of cultured rat heart myocytes 117-120
 Wallakat G, *see* Henning U *et al.*
 Wallakut G, *see* Hoch B *et al.*
 Weglicki WB, *see* Blasig IE *et al.*
 Weisensee D, *see* Sharma HS *et al.*
 Werdan K, *see* Müller-Werdan U *et al.*
 Wilson S, Song W, Karoly K, Ravingerova T, Vegh A, Papp J, Tomisawa S, Parratt JR and Pyne NJ: Delayed cardioprotection is associated with the sub-cellular relocalisation of ventricular protein kinase C ϵ , but not p42/44MAPK 225-230
 Wolf I, *see* Wallukat G *et al.*
 Wolf W-P, *see* Henning U *et al.*
- Ziegelhöffner A, Ravingerová T, Džurba A, Tribulová N, Slezák J, Breier A and Szekeres L: Prevention by 7-oxo-prostacyclin of the calcium paradox in rat heart: Role of the sarcolemmal (Na,K)-ATPase 257-263
 Ziegelhöffner A, *see* Breier A *et al.*
 Zimmer H-G: Regulation of and intervention into the oxidative pentose phosphate pathway and adenine nucleotide metabolism in the heart 101-109
